

Genie Grips®

Loading Mirrors

The magic
is in
the mirrors.

Always on guard

Eliminate critical blind spots in the driver's vision.

Genie Grips Loading Mirrors eliminate critical blind spots in the driver's vision. The mirrors allow drivers to sight the forks and see around the load, significantly improving safety and reducing accidents, injury, and damage to goods and the infrastructure.

Easily fitted to the mast, Genie Grips Loading Mirrors are reliable, easy to use, more robust than camera systems, and give a bigger, more intuitive field of view – like a car mirror system, only looking forward. These forward vision mirrors eliminate the need for driving backwards.

Forklifts are considered essential to warehouse operations. They make tasks like carrying, pushing, pulling, and lifting materials efficient and easy. They are also dangerous. When operators can't see what's in front of them, that's dangerous. The ability to see around corners, into parallel aisles, and other blind spots supplies drivers with information needed to make better decisions.

Significantly improves safety.

- Genie Grips Loading Mirrors allow operators to see around the load. This helps prevent damage to goods, improves safety and efficiency, and reduces driver strain and injury.
- Made with non-marking and oil resistant compound.
- Easy installation and removal. Magnets allow for securely attaching the mirrors to the mast at driver's eye level.

Suitable for all environments.

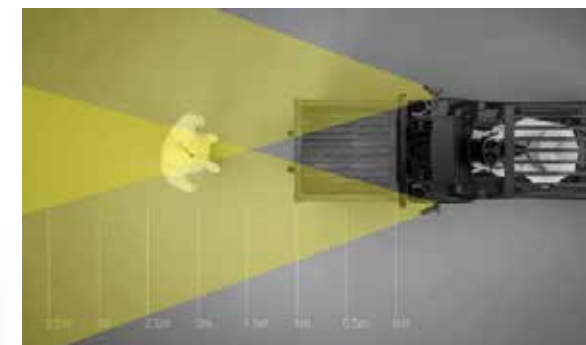

Available in Slimview and Wideview, the Genie Grips Loading mirrors are applicable in all material handling environments, from small warehouses to large factories and everything in between.

Slimview

- For use in confined spaces.
- Fits within forklift footprint.
- Sight forks with compressed forward view.
- Suitable for smaller forklifts.

Wideview

- For use in open areas with high traffic.
- May extend beyond forklift footprint.
- Sight forks with panoramic forward view.
- Suitable for larger forklifts.

Specifications

MEASUREMENTS	Slimview	Wideview
Whole Unit Width	10"	14"
Parabolic Lens Width	5"	8"
Parabolic Lens Length	16"	16"
Flat Mirror Width	5"	5"
Flat Mirror Length	12"	12"
Mounting Bracket Width	3"	3"
Mounting Bracket Length	11"	11"

MOUNTING

Black Arms:	PA6 GF15 (Polyamide 6 - 15% Glass Fiber Reinforced)
Yellow Housing:	ABS (Acrylonitrile butadiene styrene)
Black Housing:	ABS (Acrylonitrile butadiene styrene)

BRACKETS

Material:	Stainless Steel
Coating:	Black Powder coating

MIRROR

Material:	Acrylic
-----------	---------

TEMPERATURE

Range:	-4 and 176 °F
--------	---------------

Our complete line of protection products will help guard against expensive product damage, equipment damage and lost productivity.
